References on diode design and development.
Signal Processing Group Inc. tech team
April 2009

1.0 Quick reference manual for Silicon integrated circuit design, W.E. Beadle, J.C.C Tsai, R.D. Plummer, Editors. Published by John Wiley and Sons.

4.0 “Determination of the threshold failure levels of semiconductor diodes and transistors due to pulse voltages.” D.C Wunsch and R.R. Bell. Braddock, Dunn and McDonald, Inc. El Paso, Texas.

5.0 “Resistivity and carrier transport parameters in silicon”. Virginia Semiconductor, www.virginiasemi.com

9.0 “Design of a pn junction diode”. Safa Kasap, Department of Electrical Engineering, University of Saskatchewan, Canada. (Web article).

13.0” A new semiconductor junction diode space charge layer capacitance model”. Paul Van Halen, Department of Electrical Engineering, Portland State University.
14.0” Capacitance of a PN junction”. Drexel University, ECE-E302, Electronic Devices Lab III: Capacitance of a PN junction.

21.0” This Week’s Citation Classic”. Irwin J.C. Resistivity of Bulk Silicon and diffused layers in silicon. Bell System Technical Journal, 41: 2387 – 410, 1962.

22.0” Applications of PIN Diodes, Application Note 922”. Hewlett Packard Application Note.

23.0” Rectification effects in PIN Attenuators. Application Note 957-3”. Hewlett Packard Application Note.

Signal Processing Group Inc., website: www.signalpro.biz. By the technical team at SPG April 24th, 2009

32.0” PIN Diodes” Hewlett Packard article.

39.0” Microsemi Micronotes, Series 701”. Bill Doherty.

41.0” Design with PIN Diodes” Macom Application Note by Gerald Hiller. # AG312.

46.0” A Simple Power Diode Model with Forward and Reverse Recovery”. Cliff L. Ma and Peter O. Lauritzen. Department of Electrical Engineering,FT-10, University of Washington, Seattle, WA 98195.
